Quiz 2 - Cancelled

Question 1 (10 Points)

Construct a relational Schema by mapping the following EER diagram (Figure Q1). The following conditions must be fulfilled when constructing the schema:

- For mapping the 1:N or 1:1 relationships, you MUST use the foreign key approach.
- For mapping the superclasses/subclasses, **select** the applicable option between 8C or 8D and **explain** briefly why the unselected option is not applicable for the given EER.

8D selected, 8C not applicable for overlapping.
